PAINTS

WATERPROOF

HEAT REFLECTION

From Director's Desk

Dear friends,

Do you know making of paints is as simple as making of detergents, the only thing is that we need to be very much careful while making of paints & providing services but even after, If something undesirable happens because of man mistake, We never give any excuse.

We give more attention on solving the issue as fast as possible to avoid any delays to our valuable "Customer" and that's why we give technical knowledge to our Techno Commercial Officer so that he can understand and solve the issue at the same time.

I want to tell you why do we exist? Why should you prefer Gujrat Paints over others players? If you are a person who likes to have a total control over cost without compromising on quality, Then we have products to meet all the aspects of your beautiful dreams like, Perfect Paint Process, Exact Cost of Project, Best Color Selection and most importantly Best Followup etc...

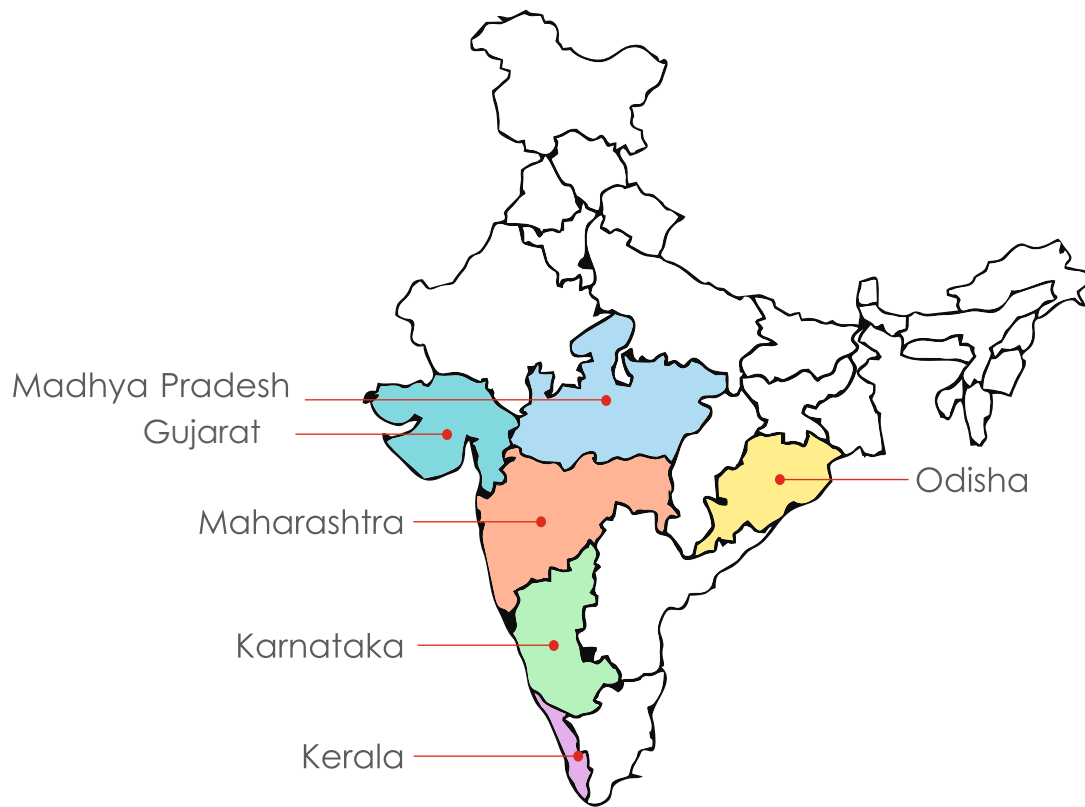

If you observe, You will find that culture and policies of many companies are not in favour of end Customer. You will also observe that some companies are not sharing their practical knowledge with the client. WHY?

Special Thanks to our Suppliers

- Wacker Chemie - Germany
- BASF - Germany
- Troy - USA
- Dupont - USA
- Solvay - USA
- Calcite - Vietnam& Egypt
- Tylose - Germany
- RAK White Cement - Dubai
- Dow - Germany

Coverage : **For Silver Sheen :**

75 - 80 sq.ft./ 2 coats /ℓ

For Silver Plus :

60 - 65 sq.ft./ 2 coats /ℓ

GPI ENAMEL, DISTEMPER & CRACK SEAL

SUPER SHEEN WASHABLE ENAMEL

Benefits :

WALLS, WOOD & STATUES.

Available Packsize : 1ℓ, 4ℓ, 20ℓ & 200ℓ

Water Dilution : 400 ml water in 1ℓ

Coverage : 65 - 70 sq.ft./ 2 coats /ℓ

STRAWBERRY Acrylic Distemper

Benefits :

Ideally suitable for interior.

Excellent Cost in Use. Smooth Finish with Good Hiding.

Available Packsize : 2, 5, 10, 20, 25 kg

Water Dilution : 400 ml water in 1kg

Coverage : 40 - 45 sq.ft./2 coats/kg

GUJRAT PAINTS CRACK SEAL

Rough finish.

Benefits :

Elastomeric Filler

Useful for

CONCRETE & WOOD

Fill UP TO 3MM CRACK

Plain finish.

GPI PRIMER RANGE

EXTERIOR WALL SILICONE PRIMER

Benefits :

Water Repellent Primer with Strong Bonding.
Ideally Suitable for exterior.
Excellent Scrub resistance.
Versatile application on Plastered wall,
brick work, Concrete asbestos.

Available Packsize : 1ℓ, 4ℓ, 20ℓ & 200ℓ

Water Dilution : 750 - 800 ml water in 1ℓ

Coverage : 80-85 Sq. ft. / coat/ℓ

GREEN BOND EXTERIOR PRIMER

Benefits :

Ideally Suitable for exterior.
Super Durability
Excellent Scrub resistance,

SUPER WHITE WALL PRIMER

Benefits :

Ideally Suitable for Interior.
Excellent Scrub resistance & cost in use.

Available Packsize : 1ℓ, 4ℓ, 10ℓ, 20ℓ & 200ℓ

Water Dilution : 500 to 600 ml water in 1ℓ

Coverage : 70 - 75 sq.ft./coat/ℓ

ICE COOL⁺

Heat Reflective + Water Proof Coating

Benefits :

Asphalt bleed resistance.

Excellent Adhesion and Tensile Strength.

Available Packsize : 1, 4, 20, & 200 ℓ

Water Dilution : No Dilution

Coverage : 15 sq.ft./ 3 coats/ ℓ
on Smooth surface condition.

Useful for

Concrete

Metal

Wood

Excellent Heat Reflection
Reduces Room Temperature

Protect from
Rain Water leakages

Excellent Crack
Bridging

WEATHER TEX

Designs :

Use different tools to get different designs

Coverage :

50-55 sq.ft for 2 mm thickness./25kg bucket

Pack Size :

In Bucket : 5kg, 25kg.

In Bag : 30kg

GPI PUTTY RANGE

WATER PROOF PUTTY With Polymer Based

INTERIOR & EXTERIOR

2X Water
Resistance

Active German
Hydrophobic
Polymers

No
Dampness

GREEN PLAST / SILVER PLAST Polymer Putty

How PUTTY is better than P.O.P. ?

POP is extremely hygroscopic and is susceptible to the ingress of moisture, which damages the surface. But Putty is a white cement & Polymer based product with the property of Very less water absorption and excellent water resistance.

That's why A coat of primer is not required before final paint over Putty.

Reason of Peeling (Bubbles on wall) from base surface ?

- 1) If applicator exceeds the specified limit of thickness. (Max. thickness given at end)
- 2) When second coat is applied over freshly (poorly set) applied first coat.
- 3) Cement paint or other paint which is water repellent results in reduced adhesion.
- 4) Air loops in Wall

Drawback of Putty ?

It cannot provide 90 degree angle between 2 walls, as total thickness of putty (coarse + fine) goes upto $(10 + 2.5) = 12.5\text{mm}$ (max.)

ARCHITECTURAL Acrylic Wall Putty

Benefits :

Ideally suitable for interior.

Good scrub resistance.

Application : - gypsum, wood, concrete, asbestos.
Smooth finish.

Available Pack Size : 1, 5, 10, 20kg

Coverage : 15 sq.ft./ coat/ kg
